Hall Ticket Number:

Code No. : 31012

VASAVI COLLEGE OF ENGINEERING (Autonomous), HYDERABAD M.C.A. (CBCS) I-Semester Main Examinations, January-2018

Time: 3 hours

Discrete Structures

Max. Marks: 60

Contd

Note: Answer ALL questions in Part-A and any FIVE from Part-B

Part-A $(10 \times 2 = 20 \text{ Marks})$

- Let p, q, r denote the following statements about a particular triangle ABC.
 p: Triangle ABC is isosceles.
 - q: Triangle ABC is equilateral.
 - r: Triangle ABC is equiangular.

Translate each of the following statements into an English sentence.

- a) $q \rightarrow p$
- b) $\neg p \rightarrow \neg q$
- c) $q \leftrightarrow r$

d)
$$p \Lambda \neg q$$

- 2. Verify that $[\neg (p \rightarrow q) \rightarrow \neg q]$ is a tautology.
- 3. Use mathematical induction to prove that 5 divides $n^5 n$ whenever n is a nonnegative integer.
- 4. Convert the following binary number to base 10 and 16: 11001110
- 5. Find the coefficient of x^4 in $(1 5x)^{-6}$.
- 6. Solve the recurrence relation $a_{n+3} 3a_{n+2} + 3a_{n+1} a_n = 0$ for $n \ge 0$
- 7. Define the terms: Group, subgroup and semi-group.
- 8. What is homomorphism of two groups? Give an example.
- 9. Define Hamiltonian path and Hamiltonian cycle.
- 10. What is a spanning tree? Give an example.

Part-B (5 ×8=40 Marks)

11.	a) Construct a truth table for the compound statement $[(p \rightarrow q)\Lambda(q \rightarrow r)] \rightarrow (p \rightarrow r)$	[6]
	b) Draw the venn diagram for commutative law of intersection.	[2]
12.	a) If n is a positive integer, prove that $1 \cdot 3 + 2 \cdot 4 + 3 \cdot 5 + + n(n+2) = [n(n+1)(2n+7)]/6$	[5]
	b) Give a recursive definition for the set of all nonnegative even integers.	[3]
13.	From a group of 10 professors, how many ways can a committee of 5 members be formed so that at least one of the professor A and professor B will be included? Solve this by using principle of inclusion and exclusion.	[8]

14. Solve the recurrence relation $a_{n+3} - 3a_{n+2} + 3a_{n+1} - a_n = 3+5n$ for $n \ge 0$ [8]

a) Explain graph, connected graph, complete graph and regular graph with an example. [[4]
b) Find the chromatic number of the complete graph K ₄ .	[4]
a) Define contrapositive, converse and inverse of a open statement and explain each with an example.	[4]
b) Briefly explain about partial order relations and Hasse diagrams.	[4]
Answer any <i>two</i> of the following:	
a) Find the coefficient of x^{15} in $(x^2 + x^4 + x^6 + \cdots)^4$	[4]
b) Find the recurrence relation, with initial condition, that uniquely determines the following geometric progression: 6, -8, 54, -162,	[4]
c) Write Breadth –First search algorithm.	[4]

c) Write Breadth – First search algorithm.
