# VASAVI COLLEGE OF ENGINEERING (Autonomous), HYDERABAD 

M.C.A. II-Semester (CBCS) Advanced Supplementary Examinations, August-2017

## Probability and Statistics

Time: $\mathbf{3}$ hours
Max. Marks: 70
Note: Answer ALL questions in Part-A and any FIVE from Part-B

$$
\text { Part-A }(10 \times 2=20 \text { Marks })
$$

1. Explain Measures of Central Tendency.
2. Write the mean of the composite series.
3. State Addition theorem for three events.
4. A die is rolled. If the outcome is an odd number, what is the probability that it is a prime?
5. State Probability Mass Function.
6. Define Binomial Distribution.
7. Explain Continuous Random Variable with an example.
8. Define Gamma Distribution.
9. Write Applications of $t$-distribution.
10. Write the conditions for the validity of $\chi^{2}$ - test.

Part-B $(5 \times 10=50$ Marks $)$
(All bits carry equal marks)
11. a) Calculate Quartile deviation and Mean deviation from mean, for the following data:

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 6 | 5 | 8 | 15 | 7 | 6 | 3 |

b) Calculate the correlation coefficient for the following heights (in inches) of fathers( X ) and their sons $(\mathrm{Y})$ :

| X | 65 | 66 | 67 | 67 | 68 | 69 | 70 | 72 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Y | 67 | 68 | 65 | 68 | 72 | 72 | 69 | 71 |

12. a) An integer is chosen at random from the first two hundred positive integers. What is the probability that the integer chosen is divisible by 6 or 8 ?
b) There are 3 true coins and 1 false coin with head on both sides. A coin is chosen at random and tossed 4 times. If head occurs all the 4 times, what is the probability that the false coin has been chosen and used?
13. a) A random variable X has the following probability distribution

| $x$ | -2 | -1 | 0 | 1 | 2 | 3 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{P}(\mathrm{x})$ | 0.1 | K | 0.2 | 2 K | 0.3 | 3 K |

i) Find $K$,
ii) Evaluate $P(X<2)$ and $P(-2<X<2)$,
iii) find the cdf of X .
b) Out of 800 families with 5 children each, how many would you expect to have?
i) 3 boys
ii) 5 girls
iii) at least one boy
14. a) A continuous random variable $X$ has a pdf $f(x)=3 x^{2}, 0 \leq x \leq 1$. Find a and b such that i) $\mathrm{P}(\mathrm{X} \leq \mathrm{a})=\mathrm{P}(\mathrm{X}>\mathrm{a})$, and ii) $\mathrm{P}(\mathrm{X}>\mathrm{b})=0.05$.
b) In a normal distribution $31 \%$ of the items are under 45 and $8 \%$ are over 64 . Find the mean and variance of the distribution.
15. a) A random sample of size 25 from a normal population has the mean 47.5 and the standard deviation 8.4. Does this information support or refute the claim that the mean of the population is 42.1 ?
b) The following data give the number of air-craft accidents that occurred during the various days of a week.

| Day | Mon | Tues | Wed | Thu | Fri | Sat |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of accidents | 15 | 19 | 13 | 12 | 16 | 15 |

Test whether the accidents are uniformly distributed over the week.
16. a) Derive the regression line of Y on X .
b) The odds that a book on Statistics will be favourably reviewed by 3 independent critics are 3 to 2,4 to 3 and 2 to 3 respectively. What is the probability that of three reviews Majority of the reviews will be favourable?
17. Answer any two of the following:
a) A manufacturer of cotter pins knows that $5 \%$ of his product is defective. If he sells cotter pins in boxes of 100 and guarantees that not more than 10 pins will be defective, what is the approximate probability that a box will fail to meet that guaranteed quality?
b) A continuous random variable X has the distribution function:

$$
F(x)=\left\{\begin{array}{ll}
0 & \text {, if } x \leq 1 \\
k(x-1)^{4} & \text {, if } 1<x \leq 3 \\
1 & \text {, if } x>3
\end{array} \quad \text { Find } \quad \text { i) } \mathrm{k}, \quad \text { ii) mean of } \mathrm{X} .\right.
$$

c) Two random samples of sizes 8 and 11 drawn from two normal populations are characterized as follows:

| Sample | Size | Sum | Sum of squares |
| :---: | :---: | :---: | :---: |
| 1 | 8 | 9.6 | 61.52 |
| 2 | 11 | 16.5 | 73.26 |

Test whether the two populations have the same variance.
